EvL Consulting is a leading provider of IT security solutions designed to protect businesses from cyber threats. With an increasing number of cyberattacks targeting email accounts, phishing scams, and other security vulnerabilities, businesses need to take proactive steps to protect their sensitive data and confidential information. EvL Consulting offers a range of IT security solutions to safeguard businesses against these threats, including advanced email security measures, phishing prevention techniques, multi-factor authentication, and security awareness training.

QUADSEC is a comprehensive cybersecurity solution that integrates several industry-leading tools to protect your organization from cyber threats. This solution includes Proofpoint, KnowBe4, Yubikey, and 1Password, all of which work together to provide a multi-layered approach to cybersecurity.

proofpoint®

Proofpoint is a leading email security solution that uses advanced threat detection and protection techniques to stop malicious emails and attachments from entering your organization's network. Proofpoint also provides comprehensive email encryption and archiving capabilities, ensuring your email communication is safe, secure, and compliant.

KnowBe4

Human error. Conquered.

KnowBe4 is an industry-leading security awareness training platform that helps educate your employees on the latest cybersecurity threats and how to avoid them. With KnowBe4, you can simulate phishing attacks, create custom training modules, and track employee progress to ensure your workforce is equipped to detect and avoid

cyber threats.

yubico

Yubikey from Yubico is a hardware-based multi-factor authentication (MFA) solution that provides an extra layer of security to your organization's accounts and applications. With Yubikey, users must physically insert a small hardware token into their device and enter a PIN to authenticate their identity, making it much more difficult for unauthorized users to access your systems.

1Password

PARTNER

1Password is a password manager that securely stores all of your organization's passwords and login credentials in one centralized location. With 1Password, you can generate strong, unique passwords for each account, ensuring that your sensitive data remains secure.

By integrating these four powerful cybersecurity tools into one comprehensive solution, QUADSEC provides a multi-layered approach to cybersecurity that addresses many of the key areas of vulnerability in your organization. With Proofpoint, KnowBe4, Yubikey, and 1Password, you can protect your organization from email-based threats, ensure your employees are educated on the latest cyber threats, add an extra layer of authentication security, and manage your passwords securely. By implementing QUADSEC, you can be confident that your organization's information flow and data are well-protected from cyber threats.
